

Electrics/Wiring Original loom. All ancillary equipment works.

Works required Cosmetic attention, carpeting, trim and repair or renewal to interior leather panels.

Roadworthiness Not tested personally. The vehicle was not subjected to mechanical examination but is valued as roadworthy.
There is a recent MOT test dated 25.5.92, valid until 25.5.93.
Mileage at date of MOT test 71504

History Vehicle bought 'for restoration' in about 1982. Restored progressively and put on road in 1987-88 after extensive body restoration. The vehicle was fitted with flat floors but in fact is one of the first production cars with the dished floor.

Date of Inspection 29th June 1992 Mileage 71541

Valuation This is a usable early E-Type FHC which is in good usable condition, and the colour contrast of its gunmetal grey paintwork and worn dark red trim makes it an attractive vehicle. In today's market there are plenty of E-Types for sale, particularly re-imported cars, but in my view it would be difficult to replace with an early 3.8 RHD of similar character. Its value, in my view, is the order of £12,000-£14,000 (twelve to fourteen thousand pounds)
